Experience

- **Data Consultant - Talan Tunisia Consulting** — Tunis, Tunisia
  Mission - GRDF - Paris, France — *Aout 2025 - Present*
  - Developed an agentic AI Solution to automate migration from PowerCenter to dbt, reducing development time by 80% and cutting execution from hours to minutes.
  - Led technical oversight and code validation for 15+ dbt projects, managing the full lifecycle from data modeling to complex transformations and monitoring.
  - Migrated semantic layers for 3 projects, optimizing Power BI performance by reducing unused components from 51.7% to 12.4% and file size from 114.4MB to 3.2MB.
  - Conducted architectural studies for Bronze/Silver/Gold pipelines using Snowflake and dbt, orchestrating complex processing with Airflow leveraging TaskGroups and dynamic DAG generation for downstream analytics.
  - Managed production incidents end-to-end from proactive monitoring and alerting to root cause analysis improving system reliability and reducing mean time to resolution

- **Data & GenAI Intern - Talan Tunisia Consulting** — Tunis, Tunisia
  Automation of the Migration to the Cloud of a Decision Support Data System — *February 2025 - Juin 2025*
  - Developed AI agents to automate conversion of relational systems to decision-support platforms using a ReAct approach, enabling near-human reasoning models and reducing manual analysis effort by 70%.
  - Implemented smart agents for automatic schema migration to Snowflake with PySpark job generation, reducing migration time from days to under 30 minutes across **50+** tables/schemas.
  - Created a ReAct-based natural language query agent translating questions into SQL with 90%+ query accuracy, paired with interactive visualization tools enabling real-time dynamic data analysis for non-technical users.

- **Data Science Intern - Sagemcom Tunisia** — Tunis, Tunisia
  Data augmentation Strategy To Enhance Load Disaggregation Models — *October 2024 - January 2025*
  - Designed and implemented a data augmentation pipeline using Deep Learning and GANs, improving the robustness of load disaggregation models.
  - Optimized device-level energy consumption detection using synthetic data generation, enhancing model accuracy and energy management efficiency.

- **Data & GenAI Intern - Orthlane** — Paris, France
  Design and Development of a Custom Chatbot based on the RAG Method — *Juillet 2024 - Aout 2024*
  - Built a RAG chatbot with Azure OpenAI and LangChain to provide fast, personalized patient support and ensure seamless and instantaneous interaction with clients.
  - Managed data flows using Apache NiFi to enhance data integration and flow efficiency.
  - Improved PDF parsing quality and speed, and enhanced storage quality by optimizing PDF parsing.

Education

- **Higher School of Communication of Tunis - SUP'COM** — Ariana, Tunisia
  Master of Engineering Diploma - Telecommunication — *September 2022 - Juin 2025*
  Relevant Coursework: *Big Data, Cloud computing, DevOps, Computer Vision, Data Engineering, MLOps and Networking*

- **Preparatory Institute for Engineering Studies of Monastir - IPIEM** — Monastir, Tunisia
  Pre-Engineering Studies - Technology and Physics; — *September 2020 - June 2022*
  Courses: *Linear Algebra, Advanced Calculus, Physics, Chemistry and Python*

Skills Summary

- **Libraries and Tools**: Pyspark, Apache Kafka, Apache Nifi, Flink, Dbt, Airflow, Informatica Power Center, Informatica Cloud, Langchain, Langgraph, GIT, Github Action, Gitlab CI, Jenkins, Docker, AWS Service, ELK Stack, SonarQube
- **Databases & Data Warehouse**: PostgreSQL, Oracle (SQL); MongoDB (NoSQL); Pinecone, ChromaDB (Vector DB); Snowflake (Data Warehouse), S3, Amazon Redshift
- **Languages**: English: B2-Level (TOEIC 795/990), French: C1-Level, Arabic: Native, Spanish: A2-Level

Volunteer Experience & Organisations

Logistic Manager, IndabaX Tunisia — *January 2023 - May 2023*

HR Manager, IEEE WIE SUP'COM Affinity Group — *May 2023 - June 2024, Tunisia*
